UX & Product Design student creating human-centered, mobile and web experiences through prototyping, research, and iterative design.

EDUCATION

Georgia Institute of Technology, College of Computing — B.S. Computational Media (Expected Dec. 2028)

EXPERIENCE

OneStream Software — Digital & Demand Marketing Web Development Intern | June 2026–August 2026

- Optimized website content and structure for SEO, LLM discoverability, and marketing data collection.
- Updated webpages with a user-centered approach, improving content organization, navigation, and overall usability.
- Conducted UX audits, usability testing, and website evaluations, documenting findings and actionable recommendations.
- Supported digital branding and web consistency, ensuring webpages aligned with OneStream's visual identity and brand guidelines.

Atlanta Information Management (City of Atlanta) — Service Delivery Intern | Atlanta, GA | Jun–Aug 2025

- Collaborated with cross-functional teams to create wireframes, interactive prototypes, and human-centered web solutions.
- Applied UX principles to AI-powered applications, improving usability and customer satisfaction.
- Conducted usability testing and presented design decisions to technical and non-technical stakeholders.
- Presented design and technical outcomes to 100+ professionals, communicating user impact, system behavior, and design decisions.

LEADERSHIP & INVOLVEMENT

Georgia Tech Motorsports — Business Team Member | 2026—Present

- Support sponsor relations, social media marketing, and digital communications.
- Update and improve the team website for usability and brand consistency.

Young Gifted Techie — Technology Education & Media | 2023—Present

- Taught prompt engineering and robotics to middle school students through hands-on STEM activities.
- Served as a Technology News Correspondent, interviewing industry professionals and covering technology-focused events.
